

## **Abu Bakar**

My name is Abu Bakar Sadozai. I am 25 years old and I am a student at university currently doing a master's degree in teaching (secondary). I have skills in reading and researching. My hobbies are to play sport, particularly cricket. I am a devout Muslim and have memorised the entire Quran.

I have personally faced many challenges of different levels in my life; some I had been successful and some unsuccessful. I have had support from my mum and that has been so important for me. My mum is my mentor as well, and my opinion is that having someone to discuss problems with, who can offer competent understanding and advice, is central to a person's personal and social well-being. Therefore, I feel I can potentially be a mentor who can try and talk with people who may like to discuss with me.

I would do my best to try and talk and behave with full honesty and integrity without being judgmental.
